Summary

Backend Developer focused on Java, Spring Boot, REST APIs, and MySQL. Leverages AI-assisted frontend development.

Skills

Backend & Frameworks: Java, Spring Boot, Hibernate (JPA)

Database & Testing: MySQL, JUnit 5

Tools: Git, Docker, Postman, IntelliJ IDEA, Warp, GitHub Copilot, Antigravity

Familiar With: System Design, Redis, Kafka, Kubernetes, GitHub Actions, OpenAPI, AWS

Projects

SpringMart | *Java, Spring Boot, Spring Data JPA, REST APIs, Docker*

- Built a Spring Boot REST API for an e-commerce application with pagination, input validation, and product search.
- Configured Spring Data JPA for relational persistence, designed entity mappings, and implemented image upload and storage for product assets.
- Containerized the backend using Docker and integrated it with a frontend client.

Student Management System | *Java, MySQL, JDBC*

- Built a standalone, layered Java application integrated with a local MySQL database to manage student records and academic data.
- Implemented CRUD operations with input validation using JDBC.
- Created reporting features with custom SQL to show grade distributions and identify top-performing students.

Education

B.Tech in Computer Science & Engineering

2021 – 2025

Pailan College of Management & Technology, Kolkata

CGPA: 8.3 / 10

- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Additional Projects & Achievements

- Built a custom DSA roadmap application to track coding progress and save preparation time.
- Designed and deployed a portfolio website for a financial advisor to accelerate client outreach.
- Built a personal workout tracker to log gym sessions, monitor progress, and optimize training efficiency.
- Developed a Java-based DSA platform integrated with a custom roadmap and direct LeetCode links for distraction-free practice.
- LeetCode 50 Days Badge (2024): Awarded to the top 6.9% globally for maintaining a 50-day problem-solving streak.
