Summary

Computer Science graduate focused on Python (FastAPI) and Java (Spring Boot) backend development. Experienced in API design, database operations (PostgreSQL, MySQL), and using AI agents (Antigravity, Cursor) to ship full-stack products end-to-end.

Skills

Backend: Java, Spring Boot, Hibernate, Python, FastAPI, SQLAlchemy, Pydantic

Data & Infra: PostgreSQL, MySQL, Docker

Tools: Postman, Swagger, Supabase, Firebase, Vercel, Antigravity, Cursor

Foundations: System Design, Redis, Kafka, RabbitMQ, AWS, CI/CD, Kubernetes

Projects

FastAPI Inventory | *Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, React* 2026

- Engineered a FastAPI REST API using Pydantic v2 schemas for request validation and Swagger UI docs.
- Integrated PostgreSQL via SQLAlchemy to manage transaction safety, database mappings, and startup seeding.
- Built a responsive React (Vite) dashboard featuring custom glassmorphic UI styling.

SpringMart | *Java, Spring Boot, Spring Data JPA, Hibernate, H2, Docker, React* 2025

- Engineered a Spring Boot REST API with JPQL multi-field search, pagination, and H2 database storage.
- Designed Spring Data JPA entity mappings and raw-byte image upload handlers.
- Containerized backend services using Docker and integrated a React frontend client.

Student Management System | *Java, MySQL, JDBC, Maven* 2025

- Built a terminal-based Java app using a layered architecture to separate business logic from database operations.
- Engineered MySQL interactions via JDBC using parameterized queries to ensure transactional safety and prevent SQL injection.
- Implemented analytics queries to generate student performance and grade distribution reports.

Additional Projects & Achievements

- Shreyan's Arc:** Interactive DSA roadmap (58 curated problems) built with React, TypeScript, and Firebase.
- J-Void:** Distraction-free Java practice environment built with React and Monaco Editor.
- WealthWise:** Client financial planning platform built with Next.js and TypeScript featuring interactive calculators.
- wrkout:** Distraction-free workout tracker for PPL splits built with Next.js and Supabase.
- Health Milestone: Lost 30 kg (66 lbs) in 1 year tracking habits on custom wrkout app.
- LeetCode 50 Days Badge (2024): Top 6.9% globally for consistent daily problem-solving.

Education

B.Tech in Computer Science & Engineering 2021 – 2025

Pailan College of Management & Technology, Kolkata

CGPA: 8.3 / 10

- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
