Summary

Recent Computer Science graduate focused on Java backend development with Spring Boot and Hibernate. Built full-stack applications using RESTful APIs and relational databases. Strong foundation in data structures and algorithms, ranked in the top 7% globally on LeetCode.

Skills

Languages & Frameworks: Java, Spring Boot, Hibernate

Databases: SQL, MySQL, H2

Tools & Technologies: Docker, Redis, Maven, Git, REST APIs, JUnit 5, Postman, Lombok, IntelliJ IDEA

Conceptual Knowledge: System Design, Swagger / OpenAPI, Testcontainers, RabbitMQ / Kafka, CI/CD Pipelines, Kubernetes, AWS / Terraform, Observability & Monitoring

Projects

SpringMart E-Commerce Platform | *Java, Spring Boot, React, H2*

2025

- Built RESTful APIs with Spring Boot for CRUD operations on products and images.
- Used Spring Data JPA with H2 for data persistence, handling product records and binary image storage.
- Developed a responsive React frontend with AI-assisted tools, creating a complete full-stack application.

Student Management System | *Java, MySQL, JDBC, Maven*

2025

- Built a Java console application using JDBC for student record management with CRUD operations and input validation.
- Created a reporting module with SQL queries to generate analytics on grade distribution and top-performer rankings.
- Migrated from file-based storage to a MySQL database, improving data persistence and query efficiency.

Education

B.Tech in Computer Science & Engineering

2021 – 2025

Pailan College of Management & Technology (MAKAUT), Kolkata, India

CGPA: 8.3 / 10

- **Relevant Coursework:** Object-Oriented Programming, Database Management Systems (DBMS), Data Structures and Algorithms, Operating Systems, Computer Networks

Achievements

- Earned the **LeetCode 50 Days Badge (2024)** — Ranked in the **top 6.9% globally** for consistent daily problem-solving
- Solved **130+ Data Structures & Algorithms problems** on LeetCode, covering **Dynamic Programming, Trie, DFS, BFS, Arrays, and Sorting**
